NEW LINE OF WHEELCHAIR CUSHIONS

Gel Medex™ wheelchair cushions are specifically engineered to reduce body interface pressure at critical points due to the unique Gel Medex™ layer. This gel layer in the middle prevents the cushion from migrating. In addition, patient comfort and support is enhanced from the composition of high-density foam found in the top and base layers. The lightweight cover is soft, stretchable, low-friction, fluid proof and bacteriostatic. Each Gel Medex™ Cushion type is available in a variety of sizes. Replacement covers are also available.

Gel Medex™ SPP:

Provides optimum cushion for proper positioning and skin protection.

Gel Medex™ SP:

Skin protection and a moderate slope design to prevent forward tilting.

GEL MEDEX™ P

GEL MEDEX™ BASIC

Gel Medex™ P:

Moderate wedge design to encourage proper positioning.

Gel Medex™ Basic:

General purpose cushion.
